

# ASHTON

COMPLETE  
CONCRETE  
SOLUTIONS

## CKS PACKAGING, INC.

### THE PERFECT WAREHOUSE FLOORING SOLUTION

ASHTON CASE STUDY: JUNE 2022

## BACKGROUND

CKS, a plastic manufacturing business with 50 years of experience, is an industry leader for packaging solutions with warehouses across the nation. A new warehouse addition in Dallas, TX, needed a concrete floor treatment to meet demand.

CKS needed a floor treatment to increase lifespan and maintain a clean, low-maintenance environment. It is also required to meet the demand for durability and stain resistance while staying within budgetary guidelines.

## OBJECTIVES

- Limit the probability of scratches and dust buildup on warehouse floors while increasing durability and decreasing maintenance
- Meet budget requirements for an ample space

## **SOLUTION**

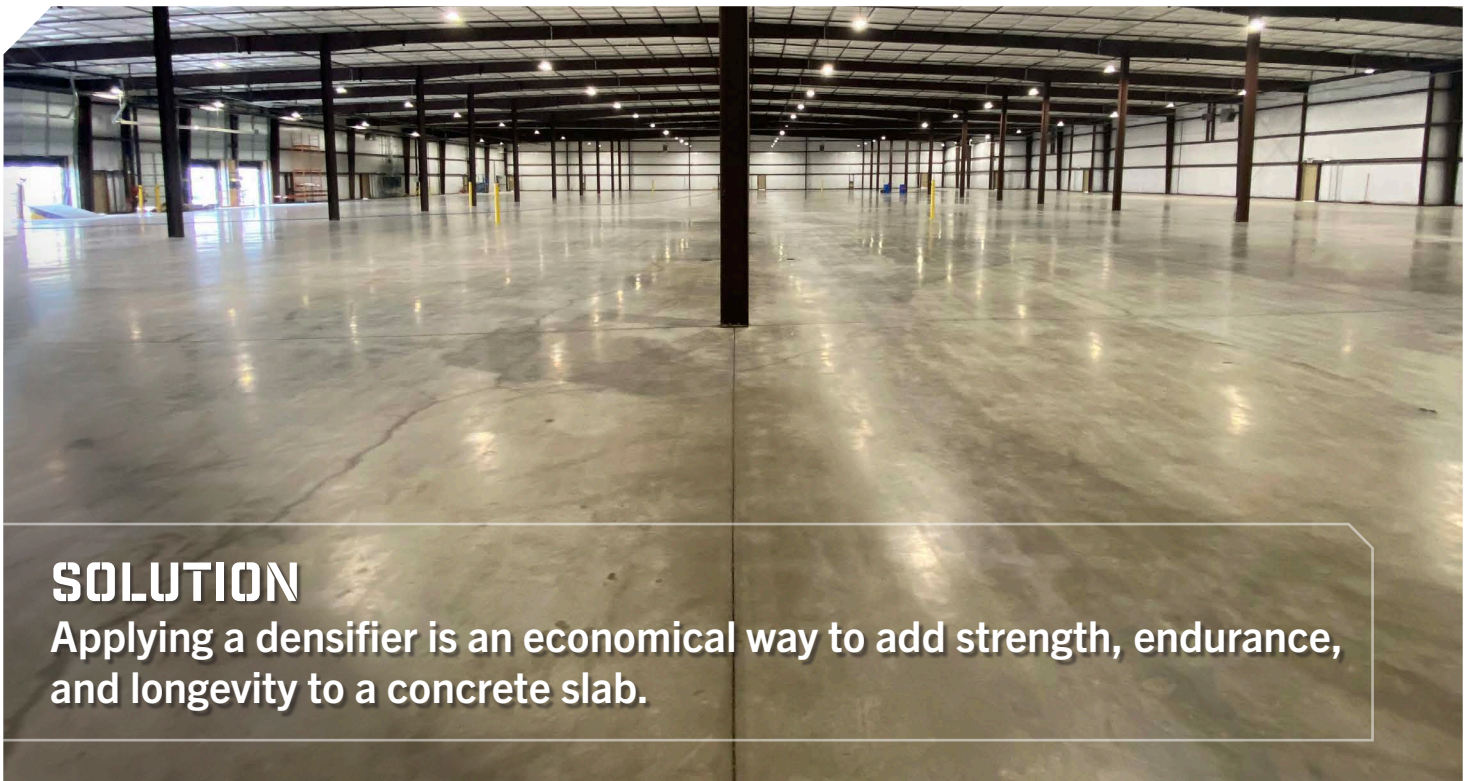

**Ashton is a leading provider of concrete flooring for commercial and industrial projects at any budget.** Not only did Ashton propose the desired level of maintenance, but they chose a technique that would reduce wear and tear over time while remaining cost-effective. In addition, Ashton completed the project in 3 days to limit business disruptions.

### **THE RIGHT PROCESS: SEAL FLOORS**

**Demo dock and boat slips leaving the original posts unharmed**

- Scrub the floors to ensure a clean surface for sealant application
- Apply the Ashford Formula Densifier seal to harden the concrete surface
  - Ashford formula is an industry leader in concrete sealants
  - Only one coat is needed to harden floors permanently

## **SOLUTION**

**Applying a densifier is an economical way to add strength, endurance, and longevity to a concrete slab.**

## **WHY ASHTON?**

Ashton takes pride in delivering varying flooring options that meet timeline, budget, and durability requirements. In the case of CKS's warehouse, Ashton knew the floor needed a simple sealant solution that would meet the need for durability while staying within the budget. Also, sealants are a great way to dust-proof any concrete floor.
